

My name is Maria and I am 15 years old. I live in Thessaloniki and I go the Aristotle College. My family consists of five members: myself, my elder brother-George and of course my parents. I like playing chess and I belong to a chess club. So, playing chess is a way out for me and I am really fond of it. Also, when I have some spare time I enjoy being physically active and spend lots of time playing sports (volleyball, basketball, skiing). I am an outgoing person and like hanging out with my friends. Moreover, I love travelling in order to reveal new places and to communicate with other people around the world exchanging ideas on a variety of topics .Generally speaking, I would like to study law in order to be able to defend people's rights in trials.
